Creative Production

Knowledgeable in all brands and
types of cameras

SUMMARY

I developed a passion for the arts and creating videos in high school. After graduating, I started working in Paris on a French series "Nos Chers Voisins". I spent the following 5 years on movie and TV sets as a camera assistant while carrying out personal projects. In 2017 I moved to the United States to develop my English fluency and learned from the American movie industry. I was able to be a part of film festivals in San Diego, Savannah and Santa Barbara and video a documentary in Cleveland. After coming back to France I founded my own video company to create movies and contract with other companies.
